Sage 100 ERP

Sage Payment Solutions

A complete payment processing solution, Sage Payment Solutions gives Sage 100 ERP (formerly Sage ERP MAS 90 and 200) customers the benefits of comprehensive business management coupled with the benefits of secure credit purchase processing—all from Sage. What's more, having all payment processing with Sage lowers processing fees and results in a lower total cost of ownership.

Studies show that more and more purchases are being made with credit cards each year, and vendors who accept credit cards can increase their sales by 15 to 50 percent. Sage 100 ERP customers can take full advantage of this opportunity with the ease and efficiency offered by fully integrated credit payment processing.

Sage Exchange is a fully Payment Card Industry (PCI)-compliant payments platform, which facilitates integration of data between Sage 100 ERP and the Sage Exchange payments platform. It also provides developer tools, which enable other software companies to easily integrate with Sage Exchange and avoid costly Payment Card Industry-Data Security Standards (PCI-DSS) certification requirements.

Sage Payment Solutions provides a complete credit card processing solution for all types of businesses. Merchants can process and preauthorize credit card payments, and perform voids or refunds when necessary. Risk mitigation features protect both you and your customer from unauthorized credit card usage.
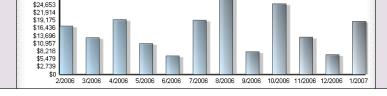

BENEFITS

- Automatically connects to Merchant Accounts for credit card authorizations and settlements

- Process payments using Sales Order, Accounts Receivable, and eBusiness Manager modules

- Complete, secure, 24/7 online transaction reporting

Compatible with Sage 100 Standard, Advanced, and Premium ERP

Features

Works the Way You Do	Sage Payments Processing adds functionality in key areas of Sage 100 ERP—Sales Order and Sales Order Invoice Entry, Accounts Receivable, eBusiness Manager .order and .store applets, Customer Maintenance, and Payment Type maintenance.
Credit Verification Version 2 (CVV2)	CVV2 helps verify card authenticity by validating that purchasers do, in fact, have the card in their possession, which helps reduce chargebacks for e-commerce and mail order purchases.
Address Verification Service	Address verification service add another layer of credit card authentication by comparing the billing address entered to the one the issuing bank has on file.
User-Level Password Protection	The system's multiple password layers increase the security of customer card numbers and information by reducing the possibility of unauthorized access into database content and functions.
Repetitive Invoicing	Turn complicated transactions into a reliable cash flow stream by simplifying your repetitive billing for services, such as membership dues.
Merchant Account Provided Solutions	Sage Payment Solutions has made it easy for businesses to accept electronic payments for more than 17 years. Funds collected from credit card transactions are automaticity deposited into your existing business bank account.
Online Reporting	Secure online access to all your key transaction information is included for your merchant account, 24/7, at: www.myvirtualreports.com
